(About Health Nurse)

Hi, I am _____, a public health nurse, working at _____
Hoken jo, public health center.

Hoken jo is where you can consult about your tuberculosis (TB) treatment and health care of your family.

Public health nurses work together with you for the recovery of your health and give patients advices

Tuberculosis is a disease that infects person to person. Therefore, doctors are obliged to report to Hoken jo when they find patients infected with tuberculosis.

Based on its reports, I am visiting you today to assist you for recovery.

The most important thing, at this moment, is that you receive treatment with a secured feeling and also that your family and friends do not suffer from the same disease.

To protect the health of your family and friends, I will ask you questions and I would appreciate if you could respond to them.

Regarding what I heard today, I will not disclose any information which may affect you disadvantageously. So, please feel free to talk about your condition and problems honestly.
